The MINES of ARIZONA

This department is under the direction of Mr. W. E. Defty, the well known mining engineer, who will carefully scrutinize all matters relating to mining in order that only reliable information relegitimate enterprises shall find a place here.

The Republican would be pleased to receive information from any part of the state regarding the development of the mining industry. All communications should be addressed: Mining Department Arizona Republican.

Help The Little Fellow help the Little Fellow fome complaint is made through-western mining districts, says Mining Engineering World, to the set that the custom smelters re-te to receive the ore shipments of It producers. There is a conges-of are at all the smelling plants, this is the cause of the curtail-

closed to him be is severely handimipped. To make a prospect produce
are sufficient to pay for its own deare sufficient to pay for its own degree sufficient to pay for its own dewelongement so a method which enchances
the unining industry and should be
grown that some reference should be
given those small producers whose
output is incidental to development,
and the marketing of which is essential to continuance of operations.

The big producer is relied upon to
keep the smaller in operation, and it
is easy to understand the good relations between the two; at the same
time, the growth of the mining industry depends upon the coming in
of new producers, many of which producers, many of which ve to pass through a difficult per-t of early development. To en-orage the small ore shippers is to

Inspiration Con. Co.

separation Con. Co. will increase its per share quarterly.

More than 16,000 tons of ore have cen resided daily for some time past it the 18 operating units of the constitution. The two additional seconds, now under construction, are exceeded to be ready before the end of the least 1,000 tons more per ay. Next year Inspiration will doubter as with the frection of a feaching to treat its oxide ores. This cost several million dollars as he capacity will be in the neighborhood of 5,000 tons a day. Further evelopment should result in large diditions to the oxide ore body.

Attention will also be given the more than force than recovered, closing with a strong undertone and numberous net advances. Total sales amounted to 655,000 shares.

Trade reports were in line with similar intelligence of the past few months—superalundant prosperity. Eank exchanges continue on a phenomenal sale with exports of raw and manufactured products making greater strides.

Other features of the day included rine receivership, restoring the property to the shareholders, and additional result in large diditions to the oxide ore body.

Attention will also be given the more than \$1,000,000. The clearing with a strong undertone and numerous net advances. Total sales amounted to 655,000 shares.

Trade reports were in line with similar intelligence of the past few months—superalundant prosperity. Eank exchanges continue on a phenomenal sale with exports of raw and manufact to 655,000 shares.

Trade reports were in line with similar intelligence of the past few months—superalundant prosperity. Eank exchanges continue on a phenomenal sale with exports of raw and manufact to 655,000 shares.

Trade reports were in line with similar intelligence of the past few months—superalundant prosperity. Eank exchanges continue on a phenomenal sale with exports of raw and manufact to fee any and any and a sale with exports of raw and manufact to the past few months—superalundant prosperity. Eank exclusion is a sale with exports of raw and manufact to fee any an

development should result in large and Pacific raffrond, disclosifuldings to the oxide are body.

Attention will also be given the more than \$1,000,000. The clearing and experimental plant will be in correction at the concentrator to work out this problem. With the completion of its leaching plant—by the end of 1917—Inspiration will be in position to rodgue 150,000,000 pounds of 1917—Inspiration will be in position to rodgue 150,000,000 pounds of 1918 leaching plant—by the end of the stock market. Bonds were irregular on compart tively light dealings. Total sales pounds of 1918—1918 and Panama comparity will be in position to finance. is leading plant from treasury funds and at the same time have a com-fortable surplus against the day when opper sells at considerable less than

it does todays

Arizona Mining Makes Underground, on the 6th or main sulace level of Inspiration, a loco-totice repair shop is being constructed near the Scorpion shaft. The shi will contain a pil necessary in mak-ny remark to the underside of a occamotive. The pit and the floor of the station will be supported by trucketal from making the station substantially fireproof. A forge, athe and drill press will be installed combling the carrying out of house repairs without the neroundhoose repairs without the necessity of having to take the locomotive to surface. The efficiency of
reinferced concrete as an underground structural material is well
exemplified in the case of the construction of the main shafts, with
stations and skip pockets. The openings comprising the stations and
pockets are unusually large, yet the
reinferced concrete constituting the
wills and roof of these epening show,
after having been in place almost
one and one helf years, no indicatots of the ground pressure.

Nacozari Con. reports that the wagon road from the mine to the S. P. raifroad at Old Nacozari has been completed. No. 2 glory hole has recently been commenced in the main turned, and has been extended 10s feet, encourtering \$1-2 per cent copper. As soon as this raise has been completed to surface, the main turned will be driven through to the Conter King in order to thoroughly open up the Pilares Copper reef, which crosses the Nacozari Con. at this point. Assay returns received from the El Paso smelter covering a carboad of ore shows values as follows 117 cast silver, \$1.79 gold, 1.25 per cent copper, 12 per cent lead and 15 per cent zinc. About 40 men are now employed by the company.

One day last week the Venture Hill in a round of shots opened up a body of ore in the face of the tunnel on which the principal development work has been done, revealing 8 inches of Southern Pacific 4 1013, native corper on the hanging wall, Southern Railway 23%, paralleled by a vein of malachite Stude-baker Co. 134% from 2 to 2 1-2 feet in width. The Tennessee Copper 2346 discovery was made 275 feet from the Fexas Company 221 surface, 87 feet distant from the old Union Pacific 149% workings in the tunnel Samples Union Pacific 53%, workings in the tunnel Samples Union Pacific 53%.

Progress is enlarging the shaft of the Jerome-Verde from one to three reserve board's statement today of the last week, owing to the fact that the last week, owing to the fact that the heavy ground has been encountered, ber 6th follows:
into which it has been necessary to drive a great deal of piling. The cates in vault, \$265,626,000; Gold set-

thement fund \$119,441,090; Total gold reserve \$386,977,000; Legal tender notes, silver, etc., \$13,991,000; Total reserve \$409,986,900; Five per cent reserve, bank, notes, \$500,000.

Bills discounted and bought—Maturities within 10 days, \$15,661,000; From 31 to 30 days \$27,810,900; From 31 to 30 days \$27,810,900; From 31 to 30 days \$27,810,900; From 31 to 50,6668.25; lambs \$7.00010.30.

The present numps on the property are capable of emulying the workings in a few days is necessary.

Among the newer roperties that are attracting the attention of mining men and investors is the United Verde Con. Co.'s, Jerome. This company has taken over the Mahurin and United Verde Jr, claims and it mapaing out a plan for extensive development work. Ensineer George Member bank deposits net, \$25,000.

A Bethunc, of San Francisco, has been looking over the properties of looking l started on both properties folowing his report. This company is also responsed to be negotiating to take over 10 claims in the Dewey country now lowned by George Human. These claims are said to have a good copper-typer-type and will be expensed by Bernstein and will be expensed by Bernstein within the next few days.

at this is the cause of the cau

HAVE YOU

INVESTIGATED

THE FOOS

It is possible to find in the FOOS line-an engine for every pur-

pose. Many rigs for special work, and engines adapted to every

condition of installation. The entire power plant is a unit when it

leaves the factory-all connected up and ready to run. No matter

what your requirement may be, we can meet it with a FOOS, all

the way from 11/2 horsepower to 500 horsepower. The value of an

engine is measured by the number of years it will run at its high-

est general efficiency. The time lost in operation, wage of em-

playes directly or indirectly affected, loss in production of work

accomplished, repair bills, attendance, fuel consumption and de-

preciation should be charged all to the engine account. The

original purchase price is all that is definite in the final cost and

is relatively unimportant. Operating cost is constant and begins

with the first turn of the flywheels, the amount depending largely upon the design and construction and the material put into the

engine by the Factory. The FOOS engine is designed and con-

structed in a manner to obtain the greatest durability and eficiency. It is to this fact that FOOS owes its supremacy. Speci-

also sold to the people of Los Angeles United Verde Extension at from 50c to \$1.00 per share, now \$40.00 per share.

ARIZONA RAY COPPER

I believe that ARIZONA RAY COPPER is the best Copper to buy now, because it will double in value, both property valuation and market valuation, before any of the other Copper stocks that I am familiar with

I predict \$1.00 per share for ARI-ZONA RAY COPPER when the first drill strikes the ore body. It should strike the ore body on fifteen days' drilling. The crews are now at work on this property. Chura drilling will start this week. High-grade ore will be taken out this week from shaft No. 1 on the Copper Zone claim No. 7.
